# **Automotive Technology Program**

Program: Automotive Technology Program

At a minimum, each program or unit Annual Program Review Update shall include measures described in <u>UHCCP 5.202</u>. Additional measures may also be used for program or unit assessment.

### 1. Program Description

#### **Program or Unit Mission Statement**

The Automotive Technology (AMT) program at Kaua'i CC provides open access, post-secondary education to qualified students. Students and technicians of the auto repair industry develop and massage their minds to think critically as a necessity of the diagnosis, repair, and maintenance of today's hi-tech vehicles.

**Part I. Program Description** 

Date of Last	4/5/2018
Comprehensive	
Review	
<b>Date Website Last</b>	Fall 2019
Reviewed/Updated	
<b>Target Student</b>	High school graduates; traditional and non-traditional students;
Population	career changing adults returning to college.
External Factor(s)	NATEF certification
that Affected the	
Program or Unit	

### 2. Analysis of the Program

Strengths and weaknesses in terms of demand, efficiency, and effectiveness based on an analysis of the Quantitative Indicators. CTE programs must include an analysis of Perkins Core indicators for which the program did not meet the performance level. Include Significant Program Actions (new certificates, stop outs, gain/loss of positions, results of prior year's action plan).

Include the Annual Review of Program Data (ARPD; all <u>Instructional programs</u> and <u>Academic Support</u> programs - Library, Technology Resources, Testing Center, Tutoring, and Financial Aid), program-developed metrics (Institutional Effectiveness programs, Office of Continuing Education and Training, campus committees), or metrics required by <u>UHCCP 5.202</u> that are not provided as ARPD (<u>Administrative Service</u> programs and some Student Support <u>programs</u>) under review in table format below (EP 5.202 and UHCCP 5.202).

### The Overall Program Health is Healthy

Describe and discuss demand, efficiency, effectiveness, and overall health categories. What has been the trend over the past three years in each of these categories? What factors (internal or external) may have contributed to the program or unit health categories? For Career and Technical Education (CTE) programs, provide a discussion on any unmet Perkins Core Indicator that includes contributing factors (UHCCP 5.202).

Based on this analysis, what are the program's strengths and areas to improve regarding demand, efficiency, and effectiveness?

Describe any significant program actions that occurred in the prior year (e.g., new certificate(s), stop outs, gain/loss of position(s), reduction in funding, new or completed grant(s), etc.).

Career and Technical (CTE) programs should provide an analysis for any unmet Perkins Core Indicators.

	Demand Indicators		2017 - 18	2018 - 19	Demand Health

The Overall Program Health is Healthy.

The Health (Overall Program Healthy) has remained HEALTHY from 2016-2019. Both Demand and Effectiveness indicators remain HEALTHY.

#### DEMAND INDICATOR

The Overall Program Health Demand Indicator has a HEALTHY rating. The number of New and Replacement Positions has increased 635 to 639 for the State and 35 to 33 for the County

Program: Automotive Technology Program

(Program Year 17-18 vs 18-19).

#### **EFFICIENCY INDICATOR**

The Overall Program Health Efficiency Indicator has remained Healthy following the new rubric for programs that has a mandated enrollment capacity. The earlier method of calculation identified the fill rate that dropped from 92.4% in yr 15-16 to 62.8% in yr 16-17 and 62.5% in yr 17-18 being rated as Cautionary. This drop in the fill rate was due to a student success initiative with an English and Math co-requisite that was added to the program requirements. It also affected the number of low enrolled classes from 3 in yr 15-16 to 13 in yr 16-17 and 9 in yr 17-18. In Fall 2016 students struggled as 75% 9 of 12 AMT students that enrolled in Math 75X during their 1st semester did not pass. As a result of their struggles 4 withdrew, 4 received N grades, and 1 received a D grade. 7 of those students also dropped out of the AMT classes after their 1st semester and did not return to our program making it a 50% class reduction. Other Trades programs were also affected as 50% 16 of 32 students did not pass with a C or higher grade in Math 75X and 42% 5 of 12 students did not pass with a C or higher grade in Math 100. This played an immediate impact on the fall to spring persistence from 74% in yr 15-16 to 65% in yr 16-17. These results affected the graduating class of Spring 2018 which also affected the rest of the Trades causing the Campus Performance Standards to drop with the Trades graduates playing a major factor.

The AMT program addressed the problem of students that were struggling in Math with early warning indicators and collaborated with the Math faculty to identify students struggling early and provided tutoring support. Students were also provided other options in meeting their graduation requirements taking Business Math as an alternative and the Trades programs will also include a Quantitative Methods class of Applied Math for Trades once it is approved by the Curriculum Committee. Feedback from students has improved in their Math classes and we anticipate a higher completion and graduation rate for our AMT students as class enrollment has improved.

There is a notable increase of 8.1% in the Efficiency Indicator #10 Fill Rate (62.5% 2017-18 vs 70.6% 2018-2019.)

#### **EFFECTIVENESS INDICATOR**

The Overall Program Health Effectiveness Indicator continues to be HEALTHY. Successful Completion has increased notably from 85% in the year 2017-18 to 90% in year 2018-19.

#### **Perkins Core Indicators**

1P1- Technical Skills Attainment was slightly below the goal of 92.92% at 77.78% although students are meeting all NATEF standards.

2P1- Completion surpassed the goal of 55% at 77.78%.

Program: Automotive Technology Program

3P1-Student Retention surpassed the goal of 81.81% at 89.47.

4P1-Student Placement surpassed the goal of 66.25% at 70.59% owing to close industry relationships with repair facilities continually inquiring for entry level technicians.

5P1-Nontraditional Participation has all AMT programs in the UHCC system not meeting these indicators. The Non-Traditional aspect of students in the AMT arena is a very low percentage nationwide. The goal is set at 23% with our actual amount at 8.57%. Until women view the auto tech career as appealing and physically attainable, we predict this trend to remain status quo. However, we have hired a Trades Program Career Track Coordinator to help all Trades program in recruiting efforts to improve nontraditional participation.

5P2-Nontraditional Completion also did not meet the goat of 23% at 11.11%. Efforts are currently being made to improve this outcome with new recruitment strategies.

The last CPR (Comprehensive Program Review) for the AMT program was successfully completed in Spring 2018. The AMT program is externally accredited by NATEF. Automotive Programs certified by NATEF go through a re-certification process every 5 years. The process includes a very comprehensive self-evaluation and on-site evaluation by a NATEF Evaluation team. The AMT program recently completed the self-evaluation and the NATEF Team was on campus in Spring 2018. To remain compliant with NATEF and industry standards, aged/inoperable equipment were identified during the self-evaluation. Equipment (wheel alignment machine, wheel balancer, "smart" diagnostic scanner, "smart" board)) was purchased to ensure students met the required training in accordance to NATEF tasks.

Our program continues to meet the requirements for Master Automobile Service Technology Accreditation-the highest level of program accreditation recognized by the National Institute for Automotive Service Excellence (ASE).

We were commended for maintaining our program standards, and continuing to meet the industry's requirements. Rapidly increasing use of Electronics Technology (Networking of multiple onboard computers; higly complexed Security Systems; Electric and Hybrid vehicles) in automotive technology makes our high quality automotive training program more valuable than ever.

### 3. Program Student Learning Outcomes

- a) List of the Program Student Learning Outcomes
- b) Program Student Learning Outcomes that have been assessed in the year of the Annual Review of Program Data.
- c) Assessment Results
- d) Changes that have been made as a result of the assessments.

Report on PSLO assessment for the prior year.

### 4. Action Plan

Include how the actions within the plan support the college's mission. In addition to the overall action plan for the program, include specific action plans for any Perkins Core Indicator for which the program did not meet the performance level.

Action Plan	<b>Anticipated Outcome</b>	<b>Actual Outcome</b>
Maintain NATEF standards	NATEF standards maintained	Remain compliant
and prepare for 2 ½ year	annually.	
Mid-Term Compliance		
review.		

List any additional significant actions that impacted your program (e.g., new certificate, loss or gain of faculty or staff, stop outs, etc.).

The Automotive Technology program has implemented a course (AMT 199V) which is a course that endeavors to rejuvenate the ABRP course of studies. This has been done because of a demand from industry to address their need of technicians to enter into the auto body repair industry. This is being done as a 199V Special Studies course under the banner of AMT.

#### **Analysis of Alignment with CPR**

List the goals that were identified to be initiated, continued, or completed during this APRU cycle, in your last CPR, and if they were achieved. Be sure to include the benchmark, desired

Program: Automotive Technology Program

outcome, actual outcome, and unit of measure. If you completed your last CPR prior to 2018, please refer to \* in this section.

Goal/Strategic Goal or Priority**	Achieved (Y or N)?	Benchmark	Desired Outcome	Actual Outcome	Unit of Measure

<sup>\*\*</sup>All Strategic Goals and Priorities are Aligned to the College Mission.

#### Describe any impacts these goals had on your health indicator(s).

Maintaining NATEF standards enabled program to remain Healthy.

\*Based on findings in Parts I – IV, develop an action plan for your program or unit from now until your next CPR date. This should include goals that align with the College Mission, measurable outcomes, benchmarks, and alignment to the College's Strategic Priorities, and/or Strategic Goals. Be sure to focus on weaknesses identified in ARPD data, PSLO outcomes, results of survey data, and other data used to assess your unit or program. This plan should guide your program and subsequent APRUs, but may be amended based on new initiatives, updated data, or unforeseen external factors.

An orientation session for substitutes should be held on a regular basis. The substitute should be a competent automobile instructor.	Yes	Substitute instructors in place	Instructors available materials ready for substitution	Faculty and APT provide coverage as needed	Program Coordinato r

#### Describe any impacts these goals had on your health indicator(s).

To remain Healthy, we will strive to maintain NATEF certification and will continue to meet with the AMT Advisory Board. This will help to ensure maintenance of national and industry standards.

\*Based on findings in Parts I – IV, develop an action plan for your program or unit from now until your next CPR date. This should include goals that align with the College Mission, measurable outcomes, benchmarks, and alignment to the College's Strategic Priorities, and/or Strategic Goals. Be sure to focus on weaknesses identified in ARPD data, PSLO outcomes, results of survey data, and other data used to assess your unit or program. This plan should guide your program and subsequent APRUs, but may be amended based on new initiatives, updated data, or unforeseen external factors.

Goal	Strategic Goal/Priority (List	Benchmark	Desired Outcome	Unit of Measure	Year(s) Implemented
	number)		Outcome	Wicasuic	Implemented

The goal of the AMT Program is to maintain NATEF certification meeting all standards while in alignment with the College Mission. All 10 NATEF Standards must be maintained annually and documented. Mandatory semi-annual Advisory Board meetings are held each Spring and Fall semesters with all instructional faculty maintaining a minimum of 20 hours industry related training annually. A 2 ½ year Mid-Term Compliance Review is performed and submitted to NATEF with a Recertification Evaluation performed every 5 years. The Advisory Board review curriculum, student success and overall program operation while making recommendations to ensure we remain in alignment with industry and national standards following the College Mission and Strategic Goals.

Goal	Strategic Goal/Priority (List number)	Benchmark	Desired Outcome	Unit of Measure	Year(s) Implemented
